

Invent a Scent

Adventure Level: Beginner

Become a master of scents by searching for and combining the best smells of nature. Can you create the perfect perfume?

Nostrils Unite!

For this challenge, your nose is the explorer. Practice deep sniffing by opening your nostrils as big as possible to let in all the smells.

Explore and Sniff

Head outside and sniff out some interesting smells. Don't just stick to flowers - try sniffing leaves, bark, moss, even dirt!

Pro tip!

Crushing leaves between your fingers will help release their scent.

Gather Ingredients

Let's create a fragrant recipe. Gather the best smells you discovered to use as ingredients. Remember to be kind to growing things. Try to use plants that are already on the ground before picking parts that are still growing.

Ingredient List

What will you use in your scent recipe?
