

# Five Things to Do

at Mundy Regional Park

1

## Have a picnic

The Lesmurdie Falls Picnic Area is situated close to the car park and accessible toilets. There are three (3) undercover picnic tables surrounded by scenic native bush.

The Lower Lesmurdie Falls Picnic Area has shaded and unshaded picnic tables available, as well as bench seating. Relax and unwind with your lunch here beside the babbling brook.

Wide, concrete paths mean that people with prams and wheelchair users can access both of these spaces.

4

## Visit Lesmurdie Falls

The spectacular Lesmurdie Falls rush 40 metres down a face of granite rock into a valley surrounded by bushland.

Visitors can view the falls from many impressive angles, including the base and top of the falls, and lookouts that sit alongside it.

We recommend the Falls Trail, a 640m return trail starting at the Lesmurdie Falls Picnic Area, which will take you to the top of the falls and the lookouts along the way.

2

## Bird spotting

There are lots of feathered friends to spot at Mundy Regional Park. But keep an eye out, as they can move quickly!

Pick a comfortable spot with a good view and try to remain quiet (bring some binoculars if you can). See if you can spot birds like kookaburras, red-tailed black cockatoos and Australian ringnecks.

5

## Explore Whistlepipe Gully

The Whistlepipe Gully trail is situated in the northern section of the park and begins at the Lewis Road car park. It's a class three (3) 3.5km loop, with some short, steep hill sections and lots of steps.

In the months of winter and spring, this trail features blossoms of wildflowers and follows a creek which flows over small waterfalls. There's also a section of the trail that boasts a larger waterfall and stunning views of Perth city.

3

## Wildflower hunting

Visit Mundy Regional Park during late winter and spring, and you'll be treated to a spectacular display of wildflowers!

Prickly moses (a species of wattle), blue fairy orchids, and myrtle hakeas are just some of the wildflowers you might see.

How many different coloured flowers can you find?
